| **Epic Link:** | FR Experience: PAS Card Testing |
| **Sprint:** | GOL Visionary 24.1.1 |
| **Acceptance Criteria:** | Visibility Testing |

Scenario : User with PAS Access, and has PAS accounts

Users who have BOB PAS access and have PAS accounts: should not get an error if API call is made for them and should see their cards displayed in Producer Workspace

If user is registered with PAS, then all PAS account cards should be visible in CRM Contacts "Find a user who has PAS access. Log in as that user to see if they can access BOB or not.
This user should have some accounts in BOB PAS and should see all of their BOB accounts as cards in CRM Contacts that belong to BOB PAS (Investments cards)

Needs to be seen if we get any API errors with this, ESQA to make a note if any error

User: as in the file (see link) Tab Test Scenarios (ESQA)
Pw: pass1234

Check this file for details:
